

CURVED ACOUSTIC PANEL

ECOU Acoustic Wood Panel is also available in a curved shape. The Slat Acoustic Panel and Perforated Acoustic Panel are the most common model for the curve panel, however other customizable pattern is also available upon request.

To accomplish a solid curve, the process of curving the acoustic panel must be controlled from raw material all the way to finishing. Customized curve according to the designer's guidelines and requirement maybe possible whilst maintaining the acoustic performance of the panel.

Should you require further information or guidelines, do not hesitate to contact us. Our team of engineers and designers will try our best to accomodate your requirements.
